но за эту цену - все равно что даром. It's ok, it was good to be free: D. Another Great Book/Game from Choice Games.. This game is truly a gem. Sega's answer to the ever popular zelda series. I don't think I'll ever understand why they didn't make more. I think this is much better than the original zelda in many ways. Tons of fun and a wonderful experience! The controls are easy, you can map them on a keyboard or a controller just fine. Sega also lets you do "quick saves" emulator style on the Sega Genesis collection. This really helps keep the game fun & easier for the current generation of gamers. I'm extremely impressed with this title. If you are on a netbook or underpowered pc, I recommend this completely. It will keep you entertained for days. ~PROXIDIAN. I played for the plot. It's just bad. Meh. If you're hurting for a old school style RPG, this might scratch that itch a bit. Sorta feels like a cross between Ultima and some kind of Spiderware game (look them up if you've never heard of them; and then go to bed cause your mommy is gonna get mad and it's a school night).. played 2 hours into it, spooky, attractive, immersive. Still haven't figure out what the game is for though

Good little pack with a few short scenarios for when you have 10-20 minutes to spare and dont want to do a full Donner Pass Scenario !

Well worth the money whilst its on sale, not sure I'd pay the full price of £39.99 for it though as each scenario is a max 10 minutes long, and there are only about 6 scenarios.

Good fun and a nice fun break from the normal DLC available

. Most immersive RTS in VR. Great graphics and solid game play. Good job devs!. **OMG IF U WANT A GAME THAT IS INTENSE HIGH ACTION PACT IN A NEVER ENDING CIRCLE WELL... TURN BACK AROUND BECAUSE THIS GAME IS SO UGLY THAT STEVE BUSCEMI WOULDNT SLEEP WITH IT. DONT EVEN USE THIS GAME FOR TRADING CARDS CASUE ITS NOT EVEN WORTH THE TIME.**

-A VERY HONEST PERSON. Great complex transport simulation, once you mastered its steep learning curve you will have lots of fun with this game. Totally free and open source. Its hard not to recommend this game.

This game is the perfect example for true dedication towards it from the developers without the constant strife for profit.. Now, this was the first legit PC game I've ever played on a computer. I mean, back when I was younger, I used to play pinball on this dinosaur computer we had, but once we got a laptop, I started indulging in the internet and downloadable games. This was the very first game I downloaded, and I have to say, I began my PC gaming on the right foot.

This game has been and always will be my favorite game. (*Yeah sorry, different favorite game now.. This game is 2nd best though!*) *The cutscenes can be a little slow, but everything is made up for in the strategy and the style and look of the game. I love the aspect of adventuring into unknown areas, especially in this game.*

If you enjoy some strategy with action and something interesting, this is definitely a game you should play.. Early access my♥♥♥♥♥ Dont even bother getting this game. its crappy

you cant change sensitivity. or bind any key.

there's nothing to do in the game exept kill each other.

just no.. I love RTS games and this game doesn't disappoint. It feels polished and its a lot of fun to play. I'd definitely recommend this to people who want to play a VR RTS game. this game doesnt even have exit button. The story for this game is ridiculous, but in a good way. I really wouldn't recommend the game for just the story-line, though. While funny, the main gameplay is simply too easy to be too much fun. The reason I recommend the game is for the "tower defense-esque" mini game, which you can go back and play after you are done with the main campaign (sort of like getting 3 stars on each level for Angry Birds). There are quite a number of levels to attempt to master, and I found this very satisfying.

The checkpoint update:

Singularity 1.1.1 is finally live with the following highlights:

-Remapped and added checkpoints to avoid repetition of cinematics - get straight back into the action! Checkpoints that just skip the introduction cinematic will not influence the score.

-LIV mixed reality compositing support (streamers please get in touch if you need support!)

-Added controls map to main menu

Bug fixes:

-Fixed Arachnoid disappearing in level 4 when the hint to beat the shield phase appeared. A big thank you to everyone who helped report this bug.

-Removed unwanted sound when starting or using checkpoint in level 4

-Fixed title display in level selection

-Fixed spelling in level 1 grenade tutorial. **Easy mode update:**

Easy mode addition

Hi everyone, the last Singularity 5 update added an easy mode to the game!

We wanted the game to be challenging, and we think it's best enjoyed when your virtual life is on the line! But we realise the difficulty was a little steep for some players. Hopefully easy mode can provide a good training ground and help beginner players or just those who want to relax and enjoy the game without stress. Easy mode will reduce the number of enemies, but it will half your final score.

This comes with a few bug fixes as well, you can now shoot the drone grenades normally to get rid of them.

Enjoy, and thank you for your feedback!
